# Introduction

- Systems Engineer
- Small startup company
- Laboratory testing equipment
- C++, Python, Bash, ...

# Requirements

- Offline
- Independent of the developer machine
- Easy to use
- Understandable

# Overview

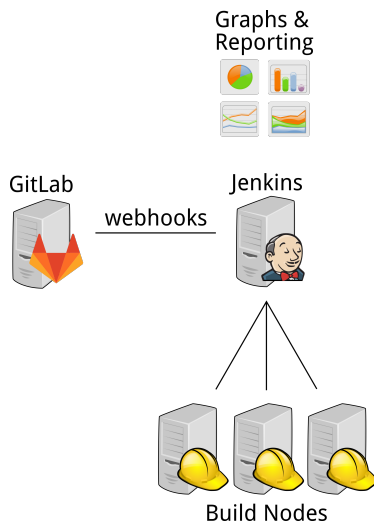

# Use case: Build & provide a stable release

Developer & GitLab

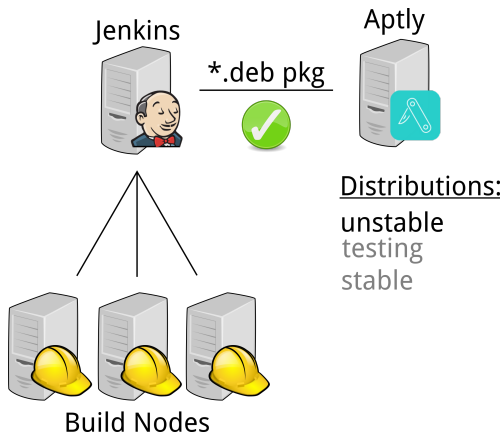

# Use case: Build & provide a stable release

## GitLab & Jenkins

# Use case: Build & provide a stable release

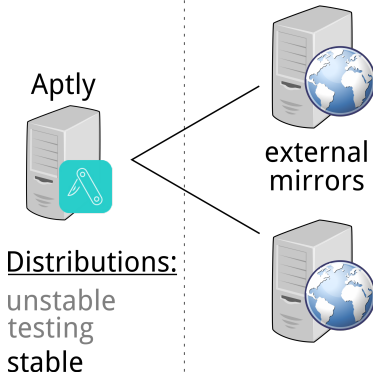

## Jenkins & Aptly

# Use case: Build & provide a stable release

Aptly & external mirrors

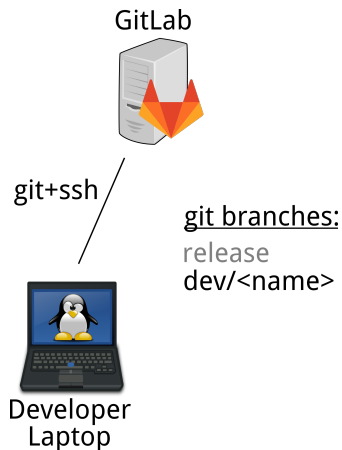

internal   external

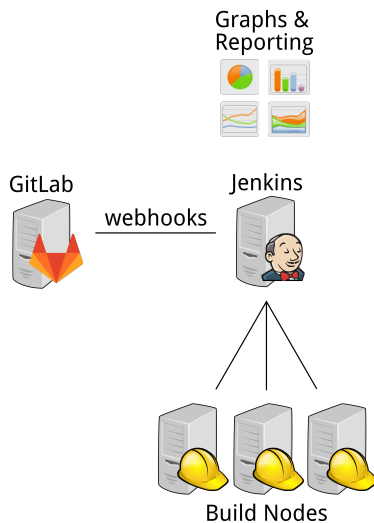

# Use case: Build a development version

## Developer & GitLab

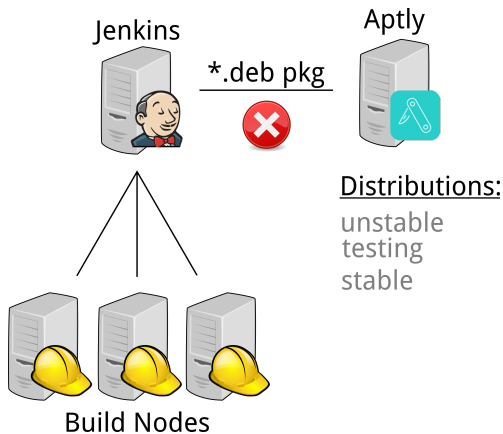

# Use case: Build a development version

## GitLab & Jenkins

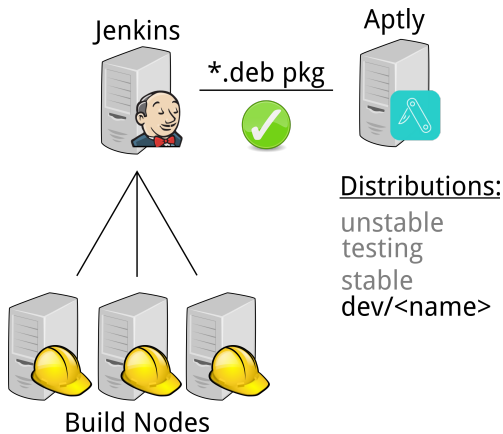

# Use case: Build a development version

## Jenkins & Aptly

# Use case: Build a development version

Jenkins & Aptly (with a dev. distribution)

# Lessons learned

- Make it easy to use
- Get services up & running quickly
- Requirements change
- Automate as much as possible
- Choose your tools wisely
