

Frantisek Zatloukal

Fedora Enthusiast Associate Software Engineer in Red Hat Editor in chief on MOJEFEDORA.cz Gamer!

Started appearing with Steam on Linux in 2012

Lots of games use "Wrappers"

The Witcher 2, Dota 2, CS:GO and many others!

Quality varies a lot (Dota 2 x War Thunder)

Almost every Windows game can run on Wine

Performance heavily variable

Regressions & Bugs

"Wine" for newbies

Automatic fixes

Separate namespace for every application

Multiple wine versions

Wine Compatibility

Almost all OpenGL and D3D9 are OK

Few D3D10 and D3D11 titles work

No D3D12 gaming

PunkBuster and lots of DRM are broken

appdb.winehq.org

Wine Performance

Terrible performance in D3D Games

CSMT - off main thread DirectX > OpenGL

Gallium Nine - "Native DirectX9" on Linux!

RX 480 & Core i5 6600K

Fedora 25 x Windows 10

OSS driver x AMD Crimson

War Thunder 160 Wine Wine -CSMT 120 Native 115.6 Windows 34.6

War Thunder

*Broken OpenGL renderer

Unigine Valley DX9 Wine Wine -CSMT Native Windows 10

Unigine Valley

*Wine CSMT > Windows

Unigine Valley GL Wine -CSMT Native Windows 10

Unigine Valley

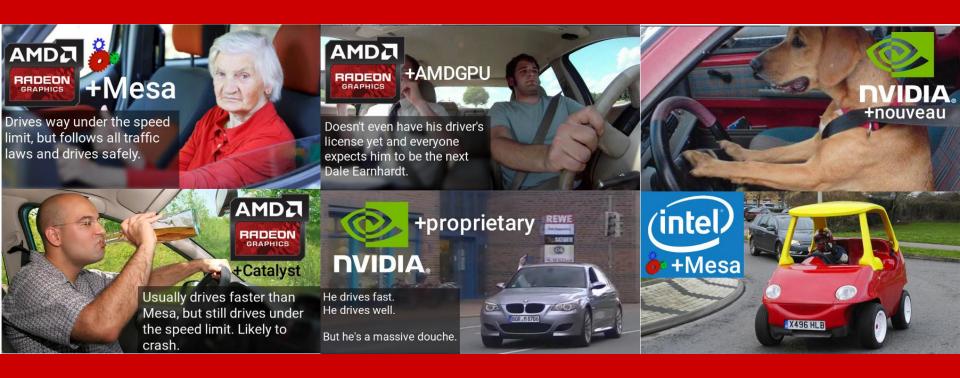

*Broken OGL on Windows

3 main GPU manufacturers

AMD, nVidia, Intel

6 drivers

AMD killed fglrx, pushing OSS driver

nVidia and Intel are improving constantly

Vulkan (!!!)

Any questions?

Thanks for your attention!
